HyGrade

Performance
you can trust

Building

HyGrade

Designed specifically for slab on grade applications where timing is everything, HyGrade combines ease of placement and finishing with reliable set and early strength development. Get slabs in faster and completed sooner without sacrificing durability.

A consistent product is important in the concrete business – but on slab pours it can mean the difference between success and failure. That's why we've developed HyGrade. Easy to place and performance you can rely on means you can achieve a high quality finish that stands the test of time, every time.

Applications

Residential Slabs

Driveways

Footpaths

Patios

Pavements

Industrial and
Commercial Slabs

Technical Info

Strength Grade
20MPa – 50MPa

Slump
100mm+

Aggregate Size
10mm or 20mm

Standards
AS1379

MSDS

Increased workability

HyGrade's specific material blend is designed for ease of placement and flawless finishing (minimum 100mm slump), making your job that much easier.

Save time and money

Get slabs done faster and joints in earlier without ravelling. Consistent, reliable set and early strength development means you can plan with confidence.

Early strength

HyGrade's superior strength reduces the occurrence of plastic cracking and surface issues caused by adverse weather conditions.
