HyLo-40

HyLo-50

A Low Carbon Concrete

With the growing demand in low carbon targets in particular in standard concrete, Hymix has developed HyLo-30/40/50 to enable 30-50% in carbon reduction.

Benefits

- **Low carbon concrete with 30-50% reduction in CO2** – support sustainability outcomes for your project
- **Guaranteed CO2 reduction** – Mixes achieve at least 30%, 40%, 50% carbon reduction
- Requires **no additional safety requirements** compared to standard concrete – pump, place and finish within standard WHS requirements.

HyLo-30/40/50 supported & validated with project based CO2 reporting

CO2 Reporting

01 Pre Project

Helps to understand what the estimated CO2 for the project could be.

02 During Project

Can help inform decisions on CO2 consumption during project.

03 Post Project

Provide accurate reporting; on embodied carbon across your project.

EPD

- 01 **Project Specific** – produce a project specific EPD
